Andheri West, Mumbai

Skills

- PHP - Laravel, Codeigniter
- Python
- Java
- React, Reflux, Redux
- Clojure
- Kafka
- Javascript, JQuery
- Git
- Grafana, Kibana
- Datadog
- NoSQL - Mongo DB
- SQL - Postgres, Yugabyte, MySQL
- Redis
- HTML5, CSS, Bootstrap
- REST APIs, Postman
- Jenkins
- AWS

Work Experience

OneStudyTeam June 2025 - Present
Software Engineer

- Work in squads on **frontend and backend development**, focusing on product building with strong expertise in scalable, high-performance micro-services.
- Integrated **OpenSearch** for advanced search capabilities and improving user experience and data retrieval efficiency.
- Leveraged **Redis** for caching and **Postgres** as the primary database to enhance application responsiveness and reduce latency.

Helpshift Technologies Pvt Ltd July 2021 - June 2025
Software Engineer 2

- Work in the Integrations team on **backend development**, focusing on **REST APIs**, scalable **webhooks**, cron jobs, and various databases along with **event-driven micro-service architecture** using **Kafka** to deliver client-centric features.
- Lead **third-party integrations**, partnering with the product team to enhance and develop new features for **channels** like SMS, Facebook, Discord, and WhatsApp.
- Utilize monitoring tools such as **Grafana** and **Kibana** to engage in proactive monitoring and efficiently resolve on-call issues.
- Develop resilient REST APIs capable of handling 1500 RPS by employing **caching mechanisms** and robust **authorisation protocols**.
- Participate actively in **recruitment processes**, evaluating and **onboarding** new team members, and providing mentorship.
- Collaborate with stakeholders across the SDLC in an agile setup.

Education

BE - Information Technology **2018 - 2021**
K. J. Somaiya Institute of Engineering & IT 9.01 CGPA

Diploma - Computer Engineering **2015 - 2018**
Thakur Polytechnic 81.94%
